EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Hildebrandt on July 22, 2011.

The application has been amended as follows:

In the Claims:

84. (Currently Amended) A system, comprising:

at least one computing device;

a storage device storing item classification data, accessible to the at least one computing device, that associates each of a plurality of item classifications with a corresponding set of attributes from a plurality of sets of attributes; and

a price suggestion application executable in the at least one computing device, the price suggestion application comprising:

logic that encodes a first user interface for rendering by a client computing device, the first user interface including a listing of the set of attributes corresponding to one of the item classifications according to a selection by a user of the one of the item

classifications, the first user interface being configured to obtain at least one input value for the set of attributes from the user;

logic that obtains the at least one input value specified by the user for the set of attributes from the client computing device; and

logic that encodes a second user interface for rendering by the client computing device, the second user interface including a suggested price range that is determined from a set of historical sales prices in an auction system for a plurality of items that are classified under the one of the item classifications and match the at least one input value for the set of attributes, the second user interface further including a graph of the historical sale prices versus a corresponding value of one of the set of attributes for each respective one of the items.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicant's arguments filed on 05/31/2011 are deemed to be persuasive and adequately reflect the Examiner's opinion as to why claims 72-96 are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

(I) US 20050125348 to Fulton discloses communications network interface for user friendly interactive access to online services wherein users can shop for merchandise by browsing through the service's most popular product categories. Upon entering "Best Buys," the display prompts users to select a category of merchandise, such as "Stereo Equipment." The next step is a selection of a specific type of product within those categories, such as "Cassette Players" or "Portable Radios." Once the selection is made, the user views a choice of manufacturers and models. The user can "page through" listings, which include a brief description, manufacturer's suggested list price, the price available to terminal users, and the cost savings associated with making the purchase through the service platform. Further, the user can access more detailed product descriptions by touching the appropriate "button." Once the user has made the selection, the order is placed directly from the "Best Buys" category.

(II) "Product differentiability in the residential message telecommunications services and MTS-like markets" to Mohajer-Jasbi discloses the analysis along the price dimension, rank orders the alternative carriers based on their price attribute as faced by

each customer and attempts to correlate the choice of the carrier (based on price) to the other attributes and the same individual characteristics.
